

## GDPR Implementation Workshops

**Series:** 2 x Half Days (7 Hours)

**Cost:** £595

**Audience:** This training is ideal for Data Protection Officers and employees tasked with the responsibility for ensuring a company's data protection requirements are met.

This course has been designed to give attendees the roadmap and knowledge required to successfully oversee the implementation of GDPR into their place of business.

This course has a practical, operational focus and will provide you with the framework and tools required to implement data protection to meet regulatory requirements.

### 1 Getting Started with GDPR Implementation

This session will give you an understanding of EU GDPR and what is required to ensure compliance to the new data protection regulations.

#### Learning Outcomes:

- Gain an understanding of the changes required and how to begin implementation
- Have an awareness of the governance and compliance required to meet the new regulations
- Learn how to implement an ongoing privacy management programme to ensure privacy is by design
- Develop an understanding of breach management planning and how to respond in the event of a data breach.

#### Course Feedback:

- *Interesting, easy to understand and thought provoking. Good plan of action to commence implementation.*
- *Loved the Governance framework (wish I'd had it months ago!) Also love the action log Paula – thank you!*
- *Great insight into Privacy Management and tools to use in order for us to undertake a brief analysis.*

### 2 GDPR in Practice

This session will focus on what needs to be embedded at an operational level to ensure good data protection practice in business and reduce the risk of non-compliance to EU GDPR.

#### Learning Outcomes:

- Develop an understanding of data protection requirements throughout the data lifecycle
- Gain an awareness of information management policies and procedures to be embedded into practice
- Be able to identify appropriate data security measures
- Understand what is required when outsourcing or transferring data to third parties
- Be able to ensure ongoing monitoring of legal compliance.
